

1. Tien Giang: New sticky rice variety is revigorated, reached yield of 5.7 tons/ha
2. An Giang: Over 81% planted rice area implemented process "3 decrease 3 increase and water saving"
3. In 2007: Export 4.4 million tons of rice
4. Rice prices in Asia market were stable because of strong demand

## Vietnam's rice market

### Production

Up to the beginning of October 2007, Soc Trang province has seeded about 21,600 hectares of winter paddy, exceeding over 1000 hectares compared to the seeded area plan of this crop. The whole province has also 11,400 hectares of 3-crop paddy, exceeding about 100 hectares compared to the plan. At the same time, Bac Lieu province has seeded over 13,000 million of paddy on land for shrimp, focusing most in Hong Dan and Phuoc Long district. Bac Lieu province is guiding the farmers to finish seeding the remained area in the mid-month of October.

Up to 2 October 2007, Cho Gao district

Source: www.agro.gov.vn

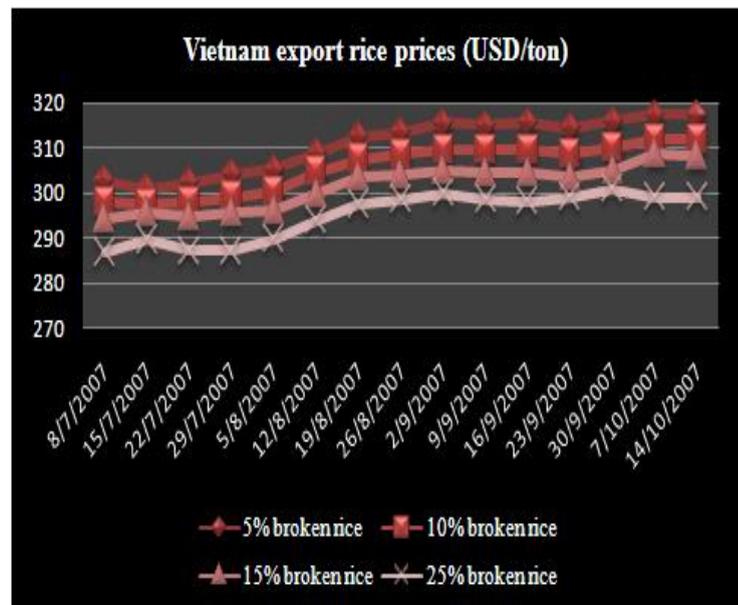

(Tien Giang province) has finished harvesting 2,000 hectares of new sticky rice with yield of 5.7 tons/ha, the highest level compared to the previous crops with selling prices of 4,000 dong/kg. Next time, Cho Gao district campaign the farmers to enlarge the new sticky rice area with 6000 hectares in 2007-2008 winter-spring crop.

During these two main crops (winter-spring and summer-autumn), An Giang Province has seeded 461,363 hectares of rice, reached 100.3% of plan, increase 1,151 hectares compared to the same period last year. Of this, An Giang farmers has seeded following process of 3 decrease 3 increase and water saving on 81% seeded rice area, encourage participation of 3,314 households. Thank to implement on right process, trunk-rice is solid, resist the disease and bring high yield of 7.1 tons/hectare in winter-spring crop and 5.11 tons/hectare in summer-autumn crop, decrease the cost and increase the profit of over 372.3 billion dong.

Can Tho has just finished harvesting 3 crop rice but following evaluation of City agriculture industry, in this 3 crop rice, the farmers have not the profit. Because the farmers did not worked the soil and clean kindly the field, the seeding is not at the same time and focus on recommendation of agriculture industry. The thousands of hectares of rice infested with brown backed rice plant hopper, rice blast disease and rice grassy stunt virus.

**Exports and Prices**

Through survey result, recently the government has defined rice export quota of the whole

Source: www.agro.gov.vn

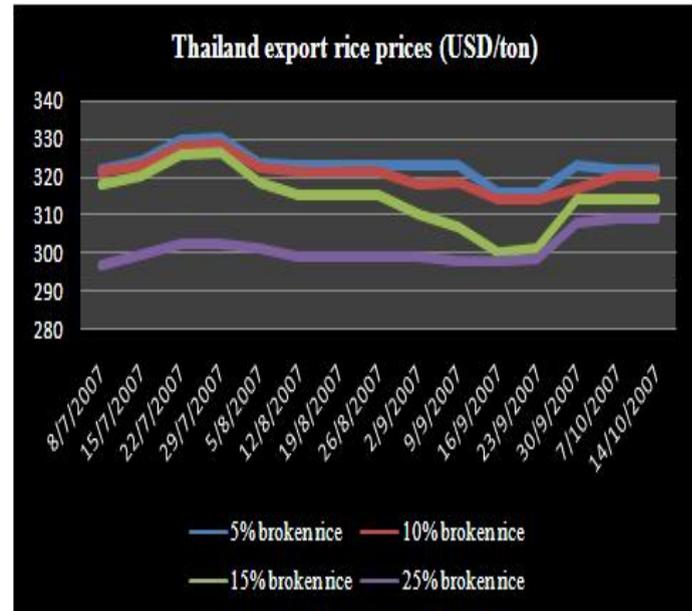

2007 of 4.4 million tons. This is the first year; Vietnam' export rice prices are as high as those of Thailand are. Before, Vietnam' export rice prices were often 30-40 USD/ton less than those of Thailand. Vietnam' average export rice prices in this year are 293 USD/ton, increase of 42 USD/ton compared to the same period last year. It is forecast in 2008, export turnover will reach over 1.4 billion USD.

During the week, the rice prices in the domestic market were stable. In Ca Mau, the prices of ordinary paddy kept at 3250 dong/kg and the prices of ordinary rice were 5500 dong/kg. In Bac Lieu, the prices of ordinary paddy increased 100 dong/kg compared to the previous week, reached 3300 dong/kg, the ordinary rice prices kept at 5200 dong/kg. The export rice prices almost unchanged compared to the previous week. 5% broken rice prices increased 0.1 USD/ton, reached 317.5 USD/ton. 15% broken rice prices decreased 0.4 USD/ton, reached 308.5 USD/ton. 25% broken rice prices stood at 299 USD/ton.

## World rice market

On 9 October, India officially issued the order of non-basmati rice export interdiction in order to dominate high prices and decide to pay higher price for wheat and ordinary rice to ensure sufficient food supply source in the domestic market. India is one of countries having the biggest quantity of export rice of the world, only after Vietnam and Thailand. Every year, India supply 3.5 million tons of rice, occupy 112.5% market share of the world rice. The order of rice export interdiction of India will raise world rice prices 8% - 9% in the next weeks, because of reducing about 1 million ton of export rice.

Thai rice prices were stable during the week because of strong demand in the world. Vietnam continue to maintain the order of new contract signing interdiction while Pakistan was absent in the rice export market because of scarce supply source. At present, Thailand is the unique rice supply source in the Asia rice market. 100% Thai rice level B were priced 330 - 333 USD/ton, FOB Bangkok, 5% broken rice prices were 320-323 USD/ton and 100% parboiled rice were priced 333 - 335 USD/ton. It is forecast that Thai rice prices are reducing because the new harvest crop is approaching. The rice production at the right time 2007/08 of Thailand will reach 23.48 million tons, increase of 2.8% compared to the 2006/07 crop.

Source: [www.agro.gov.vn](http://www.agro.gov.vn)

According to Food Agriculture Organization, the paddy production of the world in 2007 reaches 633 million tons, about record level in 2005. The paddy production will increase in some main rice production countries of Asia, Africa, Latin America and Carribe if the weather continues to be favorable. However, the paddy production will reduce in Europe, South America, Australia, and United State America because of drought and many farmers are changing to plant other agriculture trees that bring high profit.
